magex

flexible and innovative products, like our company

Magex was founded in 1998 in province of Vicenza. For over twenty years, we have been designing and manufacturing vending machines.

In the vending and automatic distribution sector in general, our products stand out thanks to the patented Magex system, that allows the insertion of products of different shapes and sizes, adapting to customer needs.

All components of our vending machines, both software and hardware, are designed, developed, and produced within our facility using high-quality materials, Made in Italy.

Our goal has always been to ensure a simple and intuitive purchasing experience, exploiting the full potential provided by new technologies to create customized projects for the customer.

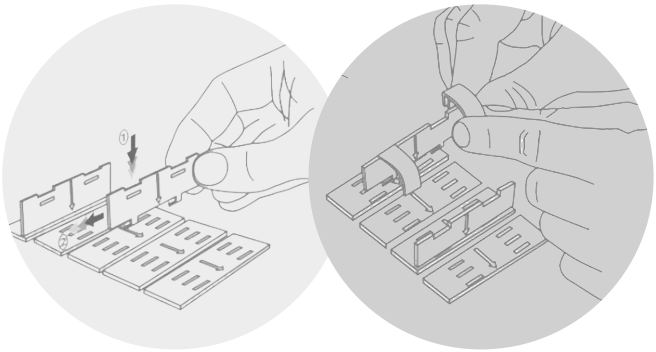
conveyor
the heart of our system

Magex's vending machines boast unprecedented flexibility in dispensing a wide variety of items.

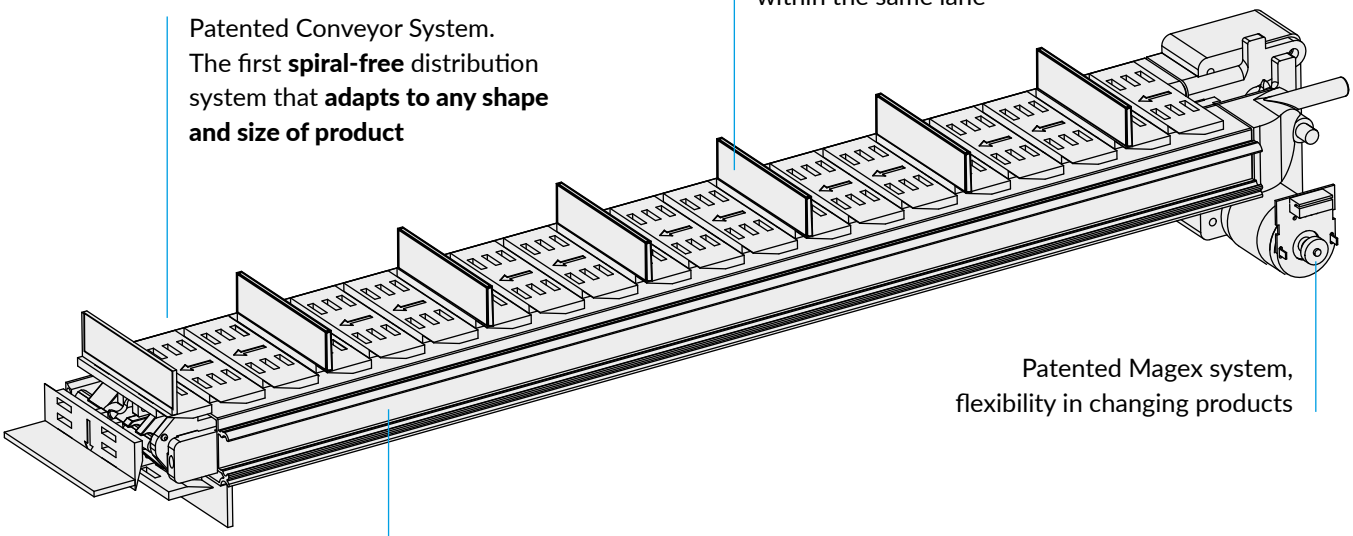
The **Conveyor**, our patented **spiral-free system**, adapts to every type of product, allowing the combination of adjacent lanes to handle larger items.

The lane system is easily configurable at any time to move objects of any size or shape, with a dedicated system that keeps products separated within the same lane.



Patented Conveyor System.
The first **spiral-free** distribution system that **adapts to any shape and size of product**

A dedicated system that keeps products separated within the same lane



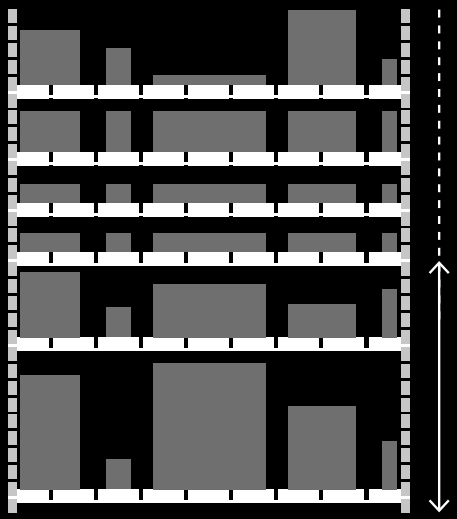
Patented Magex system, flexibility in changing products

The lane system is easily configurable at any time to move objects of any size or shape

the display shelf adapts to your product

WIDTH AND DEPTH
The lane on each floor can advance independently or simultaneously. Through our provided software, multiple belts can be advanced simultaneously.

SHELF HEIGHT
Through a quick-release, slide-in/ slide-out system, the heights of the display shelves can be adjusted.



D
adjustable depth
Snap-in dividers

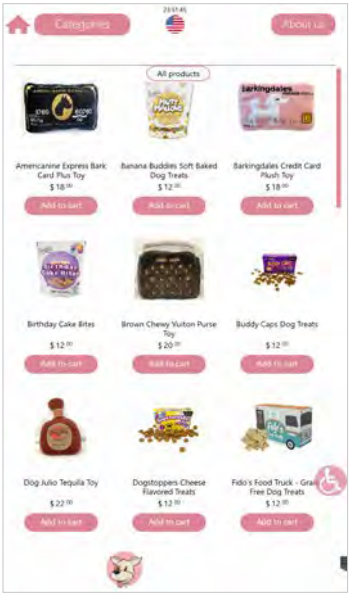
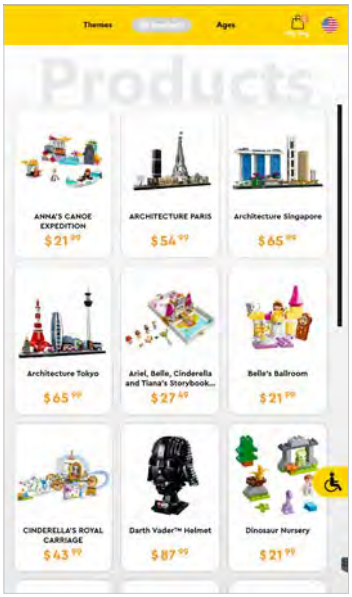
software
a simple, modular, and always connected management

The **Magex software** comprises three fundamental components: the **user interface software**, responsible for managing the vending machine; the **electronic software**, which interacts with all internal machine systems; and finally, the **web software**, which facilitates communication with all internal systems, web applications, and external servers.

With a solid history of over 15 years, Magex software continues to evolve through the integration of cutting-edge technologies, ensuring optimal performance and offering a user experience that exceeds every expectation.



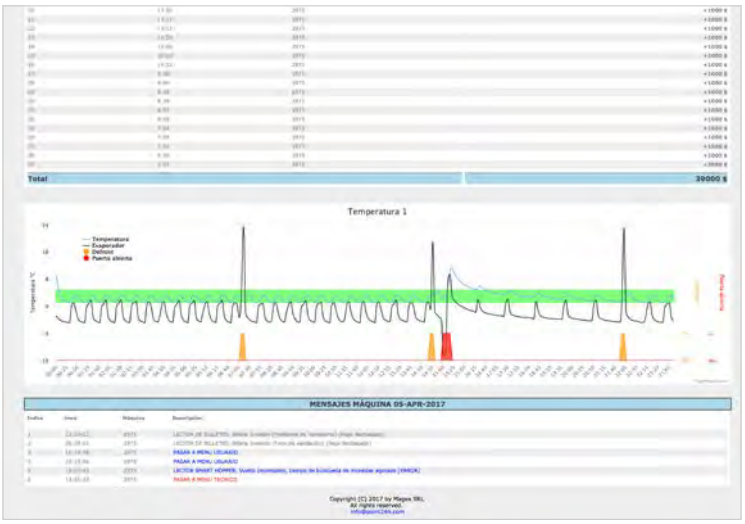


user interface

Products are conveniently chosen through a screen, where **the customer can read product information and view photos and videos**. The user interface can be customized upon request.

product management

Creating product galleries and pairing them with machine lanes is extremely easy. Our management software is simple and intuitive to use.



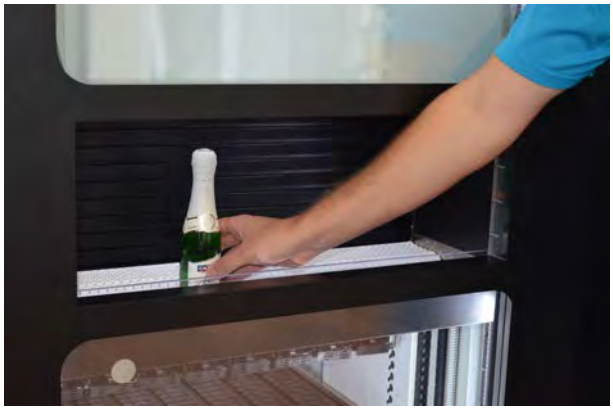
analytics

Magex provides a comprehensive system for **real-time management** of your vending machine through the online interface. Our solution allows to monitor sales statistics, the stock status, the quantity of banknotes in the machine and the fridge temperature.

technologies
simplicity, practicality and innovation

CLEANING

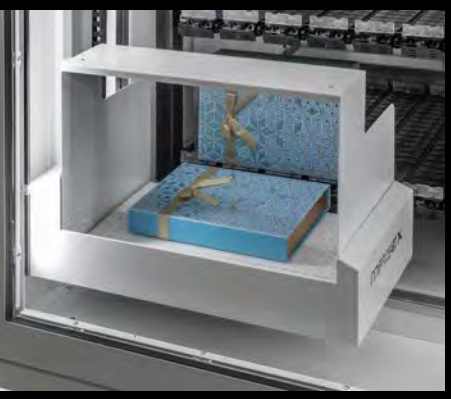
The pickup area is touched by everyone. Now you can choose a safe dispensing by installing our patented sanitization system.



ANTI-THEFT SLIDING PANELS AND SECURITY VIDEO

For our Easy line, the new patented system with sliding panels allows the closure of product lanes behind the dispensing compartment, preventing potential thefts.

Additional panels can also be installed individually on other shelves to obscure products that may be sold after age verification.



DELICATE DISPENSING

Our internal elevator allows the dispensing of the most fragile and delicate products, such as pastries, cakes, bottles, and eggs, accompanying the products directly to the pickup area.

INDUSTRIAL FRIDGE AND HIGH-EFFICIENCY INSULATION

Magex vending machines are equipped with a high-power industrial fridge and insulation system, ensuring temperature maintenance.

VARIABLE WEIGHT MANAGEMENT

Meat, fruit, cheese: with the patented variable weight selling system, the Magex vending machine manages the correct price for products sold based on weight.

SPACIOUS AND CONVENIENT PICKUP AREA

The pickup compartment of the Easy line is positioned at a height of 90 cm from the ground. Additionally, the pickup window opens and closes automatically.

CONVEYOR LIFT

Our internal elevator is designed to dispense products with extreme delicacy. A conveyor belt inside the elevator gently moves the products.

22" TOUCH SCREEN

Thanks to the 22" touch screen, customers can visualize and choose products directly from the screen, with the ability to read product descriptions and ingredients.
For each product, there is also the option to add up to 4 photos and a video.

SATELLITE MODULE

The Satellite Module is controlled by the main vending machine, called Master. The Satellite Module is a fully-fledged Magex machine but without the control console with a touchscreen.
An entire room can be transformed into an automated store by combining Master vending machines and their Satellite Modules.

SMART VENDING MACHINE

The Idea line is characterized by intelligent vending machines, with 6 or 9 lanes, featuring a 10” or 22” touchscreen designed for dispensing delicate products.

INTERNAL ELEVATOR

Our delicate internal elevator allows for the dispensing of sweets, cakes, cupcakes, as well as eggs, wine bottles, technological products, etc.

The patented Magex system enables the vending of products of different shapes and sizes.

22” OR 10” TOUCH SCREEN

The touchscreen provides a user experience similar to that of an e-commerce platform. The screen offers a menu where the consumer can browse product descriptions, photos, and videos.

IDEA9 SATELLITE MODULE

The Satellite Module is controlled by the main vending machine, known as the Master. The Satellite Module is a fully-fledged Magex machine but without the touchscreen control console. An entire room can be transformed into an automated store by combining Master vending machines and their Satellite Modules. The Idea9 Satellite Module can be paired with all Master vending machines.

TRAY DISPENSING SYSTEM

An RFID reader built into our machines provides tag recognition when the operator loads products. Tag pairing can be done remotely; during loading, a robotic arm will automatically place the items in the correct position. An intelligent control system identifies the thickness of the products to optimize space in the internal warehouse.

FOR SALE OR RENTAL

Library is a robotic warehouse suitable for both sale and rental. The tray dispensing system moves on three axes and operates in both directions: to and from the pickup area, allowing items to be taken and returned. This feature is particularly suitable for books, tools, or personal protective equipment, but it can be useful for any product that fits the tray size: 240 x 300 mm.

The return process can be set up using loyalty cards or QR codes. If not configured, the machine will simply function as a regular vending machine.

PRODUCT DISPLAY CASE

Upon request, we offer optional glass doors to replace standard doors. Additionally, display shelves for attention-grabbing gadgets can be added, ensuring an appealing presentation of products inside the vending machine.

door/glass or door/blind version

PERFECT FOR SALES AND AS A PICKUP POINT

Boxmax is available both as a standalone machine (called Master) and as a Satellite Module to be attached to your Magex vending machine to expand its functionalities. Boxmax is the accessory that allows you to add a versatile space to your automated store suitable for both sales and as a pickup point.

It is managed from the main machine's console and allows the opening of the dedicated door for each individual customer. It is the perfect solution for large-sized products as well.

CREATE YOUR SPACE

Make the most of modularity and customize your Boxmax: independently configure shelves and hatches to create a larger compartment.

10" TOUCH SCREEN

Thanks to the 10" touch screen, customers can view and choose products directly from the screen, with the option to read the product description and ingredients. Additionally, for each product, there is the possibility to add up to 4 photos and a video.

additional modules and solutions for every need

MICROWAVE COLUMN

Vending machines with a microwave! Upgrade your vending machine to a self-service restaurant where you can install up to three ovens.

The Microwave Column is controlled by the main console, which will automatically set the appropriate parameters for cooking the purchased products.

The Microwave Column is suitable for all Magex vending machines. Alaska, our frozen vending machine, is the recommended choice. Save time with parallel purchasing: while one oven heats the dish, a second customer can make another purchase.

SATELLITE MODULES

Need more space?
The Easy, Vision14, and Idea9 lines can accommodate the growth of your business over time with satellite modules.

The Satellite Module is controlled by the main vending machine, called the Master. The Satellite Module is a full-fledged Magex machine but without the control console with a touchscreen.

An entire room can be transformed into an automatic store by combining Master vending machines with their Satellite Modules.

The Easy, Idea, and Vision lines can have up to four satellites. Different temperatures can be set in each module with our optional cooling system (for example, one temperature suitable for food and another for beverages).

AUTOMATIC DISPENSER + LOCKER

Boxmax is the locker you can add to your Magex automatic dispenser to expand its features.

It is controlled by the main machine. Up to 16 lockers for the non-refrigerated satellite version and up to 12 lockers for the refrigerated satellite version. They can be used for selling, renting, or as a pick-up point.

You can request the configuration of the doors that best suits your needs.

applications

magex vending machines are real automated stores available 24 hours a day, suitable for placement in any location

CAKES AND CUPCAKES

High pastry is one of the successful markets for Magex solutions.
Our delicate dispensing system can even dispense the most fragile and decorated cupcakes, stored at the correct temperature.

ICE CREAM AND FROZEN PRODUCTS

Our Alaska vending machines can maintain a temperature of up to -23°C and dispense even the most delicate ice creams, thanks to the internal elevator.

FRESH TO THE TABLE

Milk, meat, fresh vegetables, and even eggs!
Sell your genuine local products with an automatic vending machine.

24H SUPERMARKET

With Magex vending machines, you can create real automatic shops open 24/7 - Imagine, for example, a small town lacking a convenience store: here's the solution!

WINE

Our automatic wine shop, far from being an anonymous experience, is the solution for selling even after closing time.
Perfect for choosing or picking up the best bottle for dinner at the last minute.
Combining it with a Satellite Module allows for different temperatures, for example, for red and white wines.

LUNCH BREAK SOLUTIONS

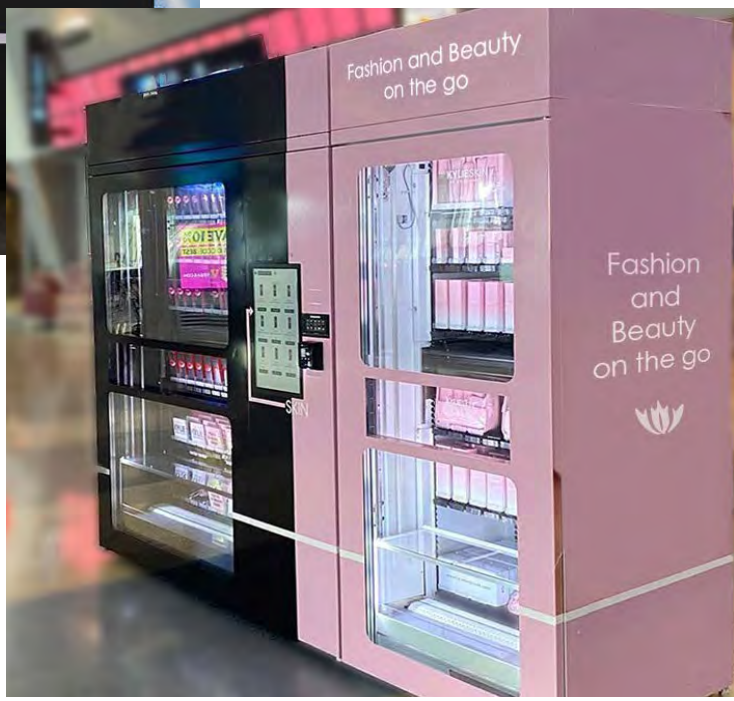
Hot meals all day long!
No more fixed schedules for your company canteen or queues at university for lunch. Enjoy your hot meal whenever you want, thanks to a Magex vending machine combined with the microwave column.
With our Boxmax, you can also provide special meals for people with specific needs (vegan, gluten-free, etc.).

TOYS

Let's not forget the little ones! Toy vending machines inside a shopping center are an irresistible temptation!

CLOTHING

Magex vending machines are perfect for selling clothing, enhancing your brand identity, or expanding your sales channels.



BEAUTY CARE

Forgot your lipstick?
No problem!
Bring your Beauty Care products anywhere: in airports or shopping malls, pamper your customers by providing them with exactly what they need in the right place at the right time.

PRIVACY VM 18

When privacy is crucial, Magex has the most suitable solution.
Dark panels can completely or partially conceal the showcase, and in addition to age verification, it allows for secure sales.

PHARMA24

Magex has developed an integration with robotic pharmacies for specific distributors. You can dispense any product available in the store that is served by the robot.

With the Pharma24 solution, medications and health products are available 24x7.
Not just sales: Pharma24 is, above all, a service.
With our Boxmax, your customers have the option to pick up prescriptions or products they have previously reserved.

DPI

Increase efficiency in managing security within your company.
At any time, your employees can independently retrieve gloves, masks, or any other essential device for working safely.

Each employee can be assigned a maximum number of daily devices through a personal code.
With Magex's Boxmax and Library machines, products can also be returned after use.
